

### SPEAKER 1 (Introduction + Technology + Nature)

Slide 1 - Introduction " ' Hei! ' was said to mean ' hello ' in Norwegian. A greeting was given to everyone. A presentation about Norway, a beautiful country located in Northern Europe, was announced. A comparison was made between Norway and Colombia. While tropical and warm weather is experienced in Colombia, cold conditions with snow and ice are felt in Norway. Coffee plantations are found in Colombia, but fjords and mountains are seen in Norway. Beauty is possessed by both countries, but in very different ways. Norway is known for its nature, technology, and interesting culture. The presentation was started."

Slide 2 - Technology "Technology was chosen as the first topic. Norway is considered a very modern country. Electric cars are loved by Norwegians! In fact, more electric cars per person are owned in Norway than in any other country in the world. The internet is used by almost everyone, and fast connections are provided everywhere. Cash is not used very much – payments are made with cards or phones. Technology is also used by the government to help people online. A digital society is represented by Norway."

Slide 3 - Nature "Nature was selected as the next topic. Incredible natural beauty is possessed by Norway! The fjords are known as the most famous feature – deep blue waters surrounded by very tall mountains are admired. Amazement is caused by them! During winter, the Northern Lights, also called Aurora Borealis, can be seen. Beautiful green and colorful lights are observed in the sky. Mountains, forests, and waterfalls are also found throughout Norway. National parks are provided where hiking and the enjoyment of nature are made possible."

### SPEAKER 2 (Knighted Penguin + Midnight Sun)

Slide 4 - Knighted Penguin "Thanks were expressed, and a very funny story was told. A penguin knight was said to exist in Norway. Yes, it is true! The name Nils Olav was given to him, and Edinburgh Zoo in Scotland is where he lives. In 2008, knighthood was granted to him by the King of Norway. He is known as the mascot of the Norwegian King ' s Guard. The full title ' Sir Nils Olav the Third, Baron ' was given to him. A military rank is held by this penguin. One of the most interesting facts about Norway is represented by this event."

Slide 5 - Midnight Sun "Another amazing phenomenon was described – the Midnight Sun. During summer, in northern Norway, the sun is not seen to set! That ' s correct – the sun is kept in the sky 24 hours a day. This condition is experienced from May to July in the north of the country. At midnight, people are allowed to go outside and sunshine is still observed. Hiking, sports, or picnics at midnight are enjoyed by them. This happens because proximity to the North Pole is possessed by Norway. A very special experience is provided by it."

### SPEAKER 3 (Fun Facts + Weird Facts + Conclusion)

Slide 6 - Fun Facts "Gratitude was expressed again, and fun facts about Norway were shared. The invention of the cheese slicer in 1925 was made by Norway. Salmon sushi was also invented in Norway instead of Japan! A coastline longer than that of the United States is possessed by Norway – an incredible fact! Coffee is loved by Norwegians and is drunk in large amounts every day. Something very important was also mentioned: a special seed vault inside a mountain is owned by Norway. Seeds from all over the world are protected inside it in case of disasters. A backup for the world ' s food is provided by this vault."

Slide 7 - Weird Facts "Now, weird facts were presented! As mentioned before, a penguin was knighted by Norway – something definitely weird! During winter, ' polar night ' is experienced in some places in Norway – no sun is seen for many weeks. This is the opposite of the midnight sun! A town named ' Hell ' is located in Norway, and freezing in winter is experienced there. Sweet brown cheese that tastes like caramel is eaten by Norwegians. A strange custom is also practiced: babies are left outside in the cold to sleep by Norwegian parents! It is believed by them that fresh, cold air is healthy for babies."

Slide 8 - Conclusion "An incredible country was shown to be represented by Norway, with amazing technology, beautiful nature, and many interesting traditions. Thanks were given for listening, and questions were invited."

TIPS FOR THE PRESENTATION: 1. Each part was recommended to be practiced several times before the presentation. 2. Slow and clear speech was advised – it should be remembered that it is an A2 level presentation. 3. Slides were instructed to be changed after each section was finished. 4. Eye contact was encouraged with the audience. 5. Smiles and confidence were advised to be maintained. 6. Timing of about one minute per speaker was suggested. Total time: Approximately 3 minutes.

WHO CHANGES THE SLIDES? Slides 1, 2, and 3 are changed by Speaker 1. Slides 4 and 5 are changed by Speaker 2. Slides 6, 7, and 8 are changed by Speaker 3. Alternatively, one person may be placed in charge of changing all slides while others speak.

Good luck was wished with the presentation!
